Re: ArcelorMittal Minorca Mine
Semiannual Compliance Report for the 2nd Half of 2019
Federal Implementation Plan for Regional Haze (FIP)

On behalf of ArcelorMittal Minorca Mine (Minorca), I am submitting the enclosed Semiannual Compliance Report for the Excess Emissions and Monitoring System Performance Reports for the 2nd Half of 2019 as required by 40 CFR 52.1235(e)(5-6).

It should be noted that while the continuous NO_X and SO_2 emissions monitoring requirements of the FIP are in effect, Minorca is not yet subject to the NO_X emission limitation specified by 40 CFR 52.1235(b)(1)(v).40 CFR 52.1235(b)(1)(v)(A) specifies that the NO_X limitation will become enforceable "…55 months after May 12, 2016 and only after EPA's confirmation or modification of the emission limit…", which has not yet occurred.

Minorca has also submitted the quarterly CEMS reports required by 40 CFR 52.1235(e)(7) on January 23, 2020. Some information specified within this report may refer you to this quarterly CEMS report and the previous CEMS report for the third quarter of 2019 submitted October 23, 2019 for additional details.

Minorca submitted a revision of the 38.16 lb SO_2/hr on a 30-day rolling average limit in accordance with 40 CFR 52.1235(b)(2)(v) on April 6, 2018. That section of the FIP provides that Minorca "may calculate a revised SO_2 limit based on one year of hourly CEMS emissions data reported in lbs SO_2/hr and submit such limit, calculations, and CEMS data to EPA." This provision to modify the SO_2 limit exists because EPA recognized that the initial SO_2 limit was based on "limited stack test data" (78 Fed. Reg. 8718) and did not reflect the variability of Minorca's operations. The revised emission limit calculation methodology follows the provisions of 40 CFR 52.1235(b)(2)(v) and results in an updated emission limit of 58.64 lbs SO_2/hr based on a 30-day rolling average (prior to adjusting to account for operating levels of the Minorca furnace which were less than capacity during the data collection period). Adjusting to reflect the emissions associated with operation of the furnace at capacity using the above equation results in a limit of 73.79 lbs SO_2/hr based on a 30-day rolling average. The revised limit became effective on the April 6, 2018 date of submittal of the limit revision package.

40 CFR 52 Subpart Y
Approval and Promulgation of Implementation Plans - Minnesota

52.1235 – Regional Haze

Semi-Annual Report (52.1235(e)(5)-(6))

Company Name (52.1235(e)(6)(i)): ArcelorMittal Minorca Mine Inc.		**Beginning date of reporting period (52.1235(e)(6)(iii)):** 7/1/2019
Company Address: 5950 Old Highway 53 North P.O. Box 1 Virginia, MN 55792		**Ending date of reporting period (52.1235(e)(6)(iii)):** 12/31/2019
Person to Contact Regarding Submittal: Jaime Johnson	**Mailing Address:** Same as above	**Telephone No:** 218-305-3337

Identification of the process unit, control devices, and CEMS covered by the compliance report. (52.1235(e)(6)(iv)):

Process Unit:

- Indurating Furnace (EU 026)

Control Devices:

- Venturi Scrubbers (CE 014, CE 015, CE 016 and CE 017)

CEMS:

- SO_2 CEMS (EU026-SO_2)
- NOx CEMS (EU026-NOx)

Attachments	
A	Records of Startups and Shutdowns (52.1235(e)(6)(v))
B	Records of Malfunctions (52.1235(e)(6)(v))
C	Deviations (52.1235(e)(6)(vi)) • Emissions in Excess of Applicable Emission Standards • Deviations of Requirement to Continuously Operate Emissions Control Device • Deviations of Requirement to Continuously Operate CEMS • Deviations for Failure to Maintain Records or Submit Reports

Certification

Name, Title and Signature of Responsible Official Who is Certifying the Truth, Accuracy and Completeness of the content of the Report (52.1235(e)(6)(ii)):
I certify, based on information and belief formed after reasonable inquiry, that the statements and information in this document are true, accurate, and complete.
